No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

GENERAL INFORMATION:
APPLICANT: WEI, MING-Hui et al
TITLE OF INVENTION: ISOLATED HUMAN G-PROTEIN COUPLED
TITLE OF INVENTION: RECEPTORS, NUCLEIC ACID MOLECULES ENC
TITLE OF INVENTION: PROTEINS, AND USES THEREOF
FILE REFERENCE: CL000750CON
CURRENT APPLICATION NUMBER: US/10/270,144
CURRENT FILING DATE: 2000-05-18
PRIOR APPLICATION NUMBER: 60/205,196
PRIOR PILING DATE: 2000-05-18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    무
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Ş
